# DENIS KORINŠEK

## Android Team Lead | Line Manager

Prevalje, Slovenia • korinsekdenis@gmail.com • linkedin.com/in/denis-korinsek

## Professional profile

Android Team Lead and Line Manager with 10+ years of Android engineering experience, combining people management, technical leadership, and software delivery.

Currently managing 5 direct reports, with previous responsibility for up to 10 Android engineers. Experienced in performance management, career development, hiring, and mentoring, with a strong focus on building collaborative, trust-based engineering teams.

Leads Android feature delivery for a mobile banking platform serving 100+ Swiss banks, remaining hands-on in architecture and development while collaborating with international engineering teams.

## Professional experience

### KAMINO → NETCETERA (NOW G+D NETCETERA)

September 2017 – Present

| | |
|---|---|
| **Senior Android Developer \| Team Lead \| Line Manager** | **Jan 2025–Present** |
| Senior Android Developer \| Line Manager | May 2023–Dec 2024 |
| Team Lead \| Android Developer | Nov 2021–Oct 2023 |
| Android Tech Lead, Payments | May 2020–Nov 2021 |
| Android Developer | Sep 2017–Apr 2020 |

*Kamino was acquired by Netcetera in 2023.*

### G+D Netcetera — People & Engineering Leadership

May 2023 – Present

#### People Management & Team Development

- **Team Leadership:** Line-managed up to 10 Android engineers; currently responsible for 5 direct reports.
- **Career Development:** Established performance assessments and individual development plans, supported by regular 1:1 meetings and feedback.
- **Engineer Growth:** All engineers I have line-managed advanced at least one internal seniority level, including one to the company's highest engineering grade.
- **Recruitment:** Conducted 40+ technical interviews to date; contribute to hiring, onboarding, promotion, and compensation recommendations.
- **AI Mentoring:** Help engineers adopt AI-assisted development practices and tools.

#### Engineering Leadership & Delivery

- **Engineering Delivery:** Lead Android development and feature delivery for a mobile banking platform serving 100+ Swiss banks, covering shared functionality and client-specific requirements.
- **Technical Leadership:** Combine hands-on development with architectural decisions, technical guidance, code reviews, and engineering quality.
- **Stakeholder Collaboration:** Coordinate delivery priorities, address technical blockers, and collaborate directly with clients and distributed engineering teams across Slovenia, Switzerland, Austria, and North Macedonia.

### Kamino — GlobalID Digital Identity & Fintech Platform

May 2020 – October 2023

Technical leadership and Android development for an international digital identity and financial services platform.

- **Android Leadership:** Served as technical lead for 4–5 Android developers, providing architectural guidance, implementation support, and mentoring; remained on the project at the client's request during the organizational transition.
- **International Collaboration:** Coordinated technical work across Android, iOS, backend, and QA teams in Slovenia, the United States, Ukraine, Colombia, and Egypt.
- **Uphold Integration:** Led Android integration of Uphold financial services, overcoming recurring integration blockers through direct collaboration with the external partner.
- **Non-Custodial Wallet:** Contributed to the architecture and implementation of a cryptocurrency wallet for ERC-20 and Solana tokens using Trust Wallet Core.
- **USBC Token:** Developed an ERC-20 token on a private network that grew into a new business.
- **Identity & Messaging:** Developed digital identity verification and in-app chat features.

### Kamino — International Client Projects

September 2017 – April 2020

Developed Android applications for international clients across multiple agency projects.
